

NANTHICHA PATMAYOTHIN

Front-End Developer

About Me

Experienced Engineer turned Front-End Developer with a passion for design. Proficient in HTML, CSS, and JavaScript. Strong problem-solving skills, ability to deliver visually appealing and functional user interfaces, and expertise in Agile methodologies. Looking to apply my technical skills and engineering background to a new challenge in Front-End Development.

Hard Skill

- Vue JS
- HTML
- CSS
- JavaScript
- Rest API
- Git

Soft Skill

- Fast learner
- Decision making
- Communication
- Collaboration
- Adaptability

Education Background

- MASTER OF ENGINEERING
LOGISTICS AND SUPPLY CHAINS SYSTEMS
ENGINEERING
- SIIT, UNIVERSITY OF THAMMASAT
Completed in 2021
- BACHELOR OF ENGINEERING
INDUSTRIAL ENGINEERING
-SIIT, UNIVERSITY OF THAMMASAT
Completed in 2020

Languages

- Thai - Native
- English - Intermediate

Projects

Apartment Management

github.com/NanthichaPatm/Apartment-vue3

Technologies: Vue.js 3, HTML, CSS, JavaScript, REST API, Bootstrap5.

The Apartment Management System is a web-based platform for managing apartment communities. The system was built using Vue3, HTML, CSS, and JavaScript, and communicates with a REST API to retrieve and store data. The application was designed using Bootstrap for responsive design.

E-commerce Website

github.com/NanthichaPatm/EcommerceWebsite-Vue3

Technologies: Vue.js 3, HTML, CSS, JavaScript, Bootstrap 5

Designed and developed a dynamic and user-friendly e-commerce website using Vue.js 3 as the front-end framework, HTML, CSS, and JavaScript for UI design, and Bootstrap 5 for responsive layout and styling. The website features a range of functionalities, including product catalog and user-friendly interface.

Restaurant Point-of-Sale (POS)

github.com/NanthichaPatm/Food-POS-Vue3

Technologies: Vue.js 3, HTML, CSS, JavaScript, Composition API

Developed a custom point-of-sale system for restaurants using Vue.js 3, HTML, CSS, JavaScript, and the Composition API for state management and component composition. The system includes functionalities such as menu display and order cart management.

Quiz App

github.com/NanthichaPatm/Quiz-Vue3

Developed a web-based quiz application using Vue.js 3, HTML, CSS, JavaScript, and the Composition API for state management and component composition. The application includes functionalities such as taking quizzes with real-time updates and score tracking.

Anime Tracker App

github.com/NanthichaPatm/AnimeTracker-Vue3

Developed a web-based animation tracker using Vue.js 3, HTML, CSS, JavaScript, and the Composition API for state management and component composition. The tracker includes functionalities such as adding and managing animations, and tracking progress.

Note App github.com/NanthichaPatm/Note-Vue3

Weather App github.com/NanthichaPatm/WeatherApp-Vue3

TicTacToe github.com/NanthichaPatm/TicTacToe-Vue3

Digital Clock github.com/NanthichaPatm/DigitalClock-Vue3
